

TODAY MORE THAN EVER WE TAKE CARE OF EACH OTHER

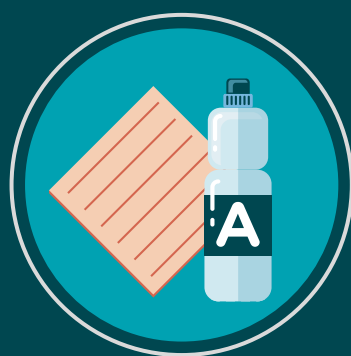

We know you have confidence in our products, because you choose them every day to feed your family.

That is why we have always been committed to providing you with safe, high-quality products, and to protecting the health and safety of our employees and our entire value chain every day. Today, we are doubling our efforts.

In response to this health emergency by COVID-19 we took the following preventive measures:

1. We develop specific health emergency protocols for each activity and each site where the company operates, including contractors and transporters.

2. We reinforce and expand our usual and strict hygiene measures.

3. We intensify the cleaning of facilities, high contact surfaces and tools.

4. We have granted licenses to high-risk personnel and implemented teleworking for administrative positions.

5. We train our staff and provide them with everything they need to protect themselves and others.

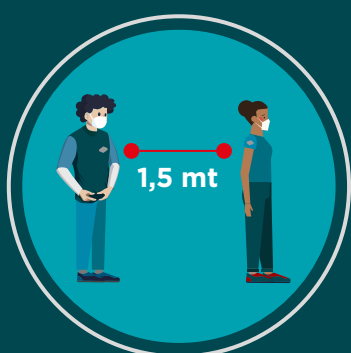

6. We expand our internal communication channels to better and faster reach everyone with the best relevant information.

7. We restrict access to visitors.

8. We implement temperature control, hand washing and health declaration at the entrance of the premises.

9. We implement social distancing measures in offices, productive areas, dining rooms, dressing rooms and other common areas.

10. We made available to the staff a direct communication channel and 24 hours with the Medical Service for consultations.

11. We developed specific instructions for logistics operations such as the transport of finished products and the reception and internal movement of materials.

12. We reinforced the biosecurity measures in our pig farms.
